

# KERALA VERMA SUBHARTI COLLEGE OF SCIENCE DEPARTMENT OF AGRICULTURE

## VALUE ADDED COURSE AND ITS OBJECTIVES Session 2024-25

**Course Name: Basic Concepts in  
Laboratory Techniques**

**Course Code: 24VACAGC1**

**Course Coordinator:** Dr. Amit Kumar  
(Associate Professor) and Dr. Vishal Kumar  
(Assistant Professor)

**Contact no.-9557105093,9927246341**

**Duration: 01/3/2025-30/4/2025**

### The objective of the program

1. To impart the basic knowledge about safety measures and good laboratory practices.
2. To develop understanding of basics of sterilization techniques.
3. To develop the skills to analyze different methods of preparations of solutions.
4. To impart the knowledge of handling sophisticated laboratory equipment's and instruments

**REGISTRATION FORM**

**VALUE ADDED COURSE**

**ON**

**Basic Concepts in Laboratory Techniques**

**Course Code-24VACAGC1**

Session: \_\_\_\_\_

Program: \_\_\_\_\_

Year/Sem: \_\_\_\_\_

Student Name: \_\_\_\_\_

Enrolment No.: \_\_\_\_\_

# SYLLABUS

## Course Name: Basic Concepts in Laboratory Techniques

### Course Code-24VACAGC1

#### COURSE OBJECTIVES

1. To impart the basic knowledge about safety measures and good laboratory practices.
2. To develop understanding of basics of sterilization techniques.
3. To develop the skills to analyze different methods of preparations of solutions.
4. To impart the knowledge of handling sophisticated laboratory equipment's and instruments

#### COURSE OUTCOME

Upon successful completion of the course students are able to acquaint knowledge and develop skills of commonly used techniques in laboratory

**Module I :** Safety measures while in Lab; Handling of chemical substances; Use of burettes, pipettes, measuring cylinders, flasks, separatory funnel, condensers, micropipettes.

**Module II:** Washing, drying and sterilization of glassware; Drying of solvents/ chemicals; Weighing and preparation of solutions of different strengths and their dilution.

**Module III:** Handling techniques of solutions; Preparation of different agro-chemical doses in field and pot applications; Preparation of solutions of acids; Neutralization of acid and bases; Preparation of buffers of different strengths and pH values.

**Module IV:** Use and handling of microscope, laminar flow, vacuum pumps, viscometer, thermometer, magnetic stirrer, micro-ovens, incubators, water bath, Hot air oven, Autoclave, centrifuge, spectrophotometer etc.
